Business revenue	23,900,000.00
Pension assets	0.00
Major gift likelihood	300
CorpTech match	0
Airplane owner	0
Screening date	12/25/2013

DS Rating: A ranking of a prospect's ability and propensity to make \$5,000+ donations.

Overall: Confidence level of name matching to donor records. Anything over 18 indicates a high degree of confidence.

RFM Total: An internal analysis of the relationship you have with each of your prospects, using a formula that includes how RECENTLY your prospect has given to you, how FREQUENTLY your prospect has given to you, and the total amount of MONEY given. Scale of 1-300. 300 is the highest rating and indicates the greatest likelihood of donating.

Assessed: DonorSearch manually assesses the top 100 prospects in your database as quality assurance that all data is correct to an 85-90% level at no extra charge.

Total of Likely Matches: Dollar amount of all positive matches to outside giving history found for the record. This total does not include “maybe” donations.

of Gifts: Number of unique positive matches to outside giving history found for the record. This quantity does not include “maybe” donations.

Foundation Board: Identifies whether the prospect is on the board of a foundation.

GuideStar Board: Indicates whether the prospect is on the board of a grant-seeking foundation.

IRS 990PF: Identifies whether the prospect is associated with a namesake grant-giving foundation.

Political Count: Number of political donations as a subset of “# of Gift Matches.”

Political Total: Dollar amount of all political donations. This is a strong philanthropy indicator—\$15K in 15 political gifts typically indicates a 5-7 figure charitable gift elsewhere.

Capacity Range based on Wealth: Estimated 5-year giving capacity range based upon a combination of real estate, stock information, business revenues, political giving and pension info. The lowest range is “Under \$10,000.”

Real Estate Estimate: Total dollar amount of all properties affiliated with the prospect. Values over \$1 million are highlighted in green, with darker green corresponding to higher values.

of Properties: Number of different properties matched to the prospect.

SEC Stock Value: Dollar value of any SEC reported stock options.

SEC Stock or Insider: Identifies whether the prospect has stock options related to being a company insider or high-ranking employee that must therefore be reported.

Market Guide: Identifies whether the prospect has been matched to the Reuters Market Guide database on company insiders.

Market Guide Compensation: Dollar value of any Market Guide reported company compensation for a given year.

Market Guide Options: Dollar value of any Market Guide reported stock options executed.

Business Revenues: Dollar value of revenues at a Dun & Bradstreet firm at which the prospect is an executive-level employee. Revenues over \$1 million are highlighted in light green, and revenues over \$5M are highlighted dark green. These revenues are reported by the company or estimated by Dun & Bradstreet, and thus may be distorted.

Business Affiliation: Identifies whether the prospect has been matched to a Dun & Bradstreet firm at an executive level position.

Pension Administrator: Identifies whether the prospect has been matched to the Larkspur SEP/Keogh Pensions database as having deferred income or a qualified pension plan.

Pension Assets: Dollar value of Larkspur/ Keogh pension plan or deferred income; not all assets may belong to the prospect.

Annual Fund Likelihood: Rating that shows the prospect's likelihood to be an annual fund donor based upon a combination of external giving matches and giving history to the client's organization. 300 = most likely; 0 = least likely. If there is no internal history, the rating will be based on external giving only.

Major Gift Likelihood: Rating that shows the prospect's likelihood to be a major gift donor based upon a combination of external giving matches and giving history to the client's organization. 300 = most likely; 0 = least likely. If there are no wealth matches, the rating will be based on external giving only.

Planned Gift Likelihood: Rating that shows the prospect's likelihood to be a planned gift donor based upon a combination of internal giving matches and the prospect's age. 300 = most likely; 0 = least likely. If there is no internal history, the rating will be based on external giving only. The age of the prospect is required for this analysis.

Corp Tech Match: Indicates if the prospect is profiled in the Corp tech database, a database of business executives similar to Dun & Bradstreet. Y = Yes, Blank = No.

FAA Pilots: Identifies if the prospect has a pilot's license and is in the FAA database.

Airplane Owner: Identifies if the prospect is an airplane owner.

Coast Guard Boat: Identifies if the prospect is a boat owner and is in the Coast Guard database.
